# ABOUT US

Based in Nairobi, Kenya, and operating out of Kitui County, we are a company driven by innovation, integrity, and international quality standards. Since our establishment in 2018, our journey has been rooted in excellence, starting from horticulture and expanding into high-demand chili cultivation and value addition. Our core strength lies in producing export-grade chili varieties — including Fresh Green Finger Chili, Fresh Red Chili, and Dry Red Chili — customized in packaging for both wholesale and supermarket retail channels. With a minimum order quantity of 5,000 kg and a monthly dry chili supply capacity of up to two 40-ton containers, we cater to large-scale buyers seeking reliability and volume without compromising on quality.
